

1. Go into the washing room next to the hammam and in the switch box turn on the switch marked "SAUNA".

2. Go back into the hammam and press for a couple of seconds the "on" button (upper left) on the Harvia control panel until you see the temperature.

After a few seconds the system will start. It may take some time until it reaches the desired temperature.

Keep the door to the hammam room closed when ON!

3. To change temperature press "M" and then "+" or "-" to raise or lower the temperature

4. To switch on the lights press the "bulb" button.

5. You can add some essential oil into the recess (**BEFORE** you start the system – safety!).

6. Please remember to switch off the system after you have used it (also the switch in the other room) and to air the rooms
